Port Noarlunga Driving Range - a new era

A major transformation

A plan has been developed for a major transformation of the Port Noarlunga Driving Range, delivered through a proposed long-term partnership between the City of Onkaparinga and GreenSpace Management.

This is not just an upgrade — it's a project that will deliver a multi-sport destination, drive active recreation, social connection and economic growth in our region.

If approved, the new facility will be managed by GreenSpace for up to 20 years, starting 1 January 2026.

The plan focuses on creating a diverse, inclusive recreational offering that enhances the existing golf focus while capturing new, high-growth sports markets.

World-class golf and practice technology.

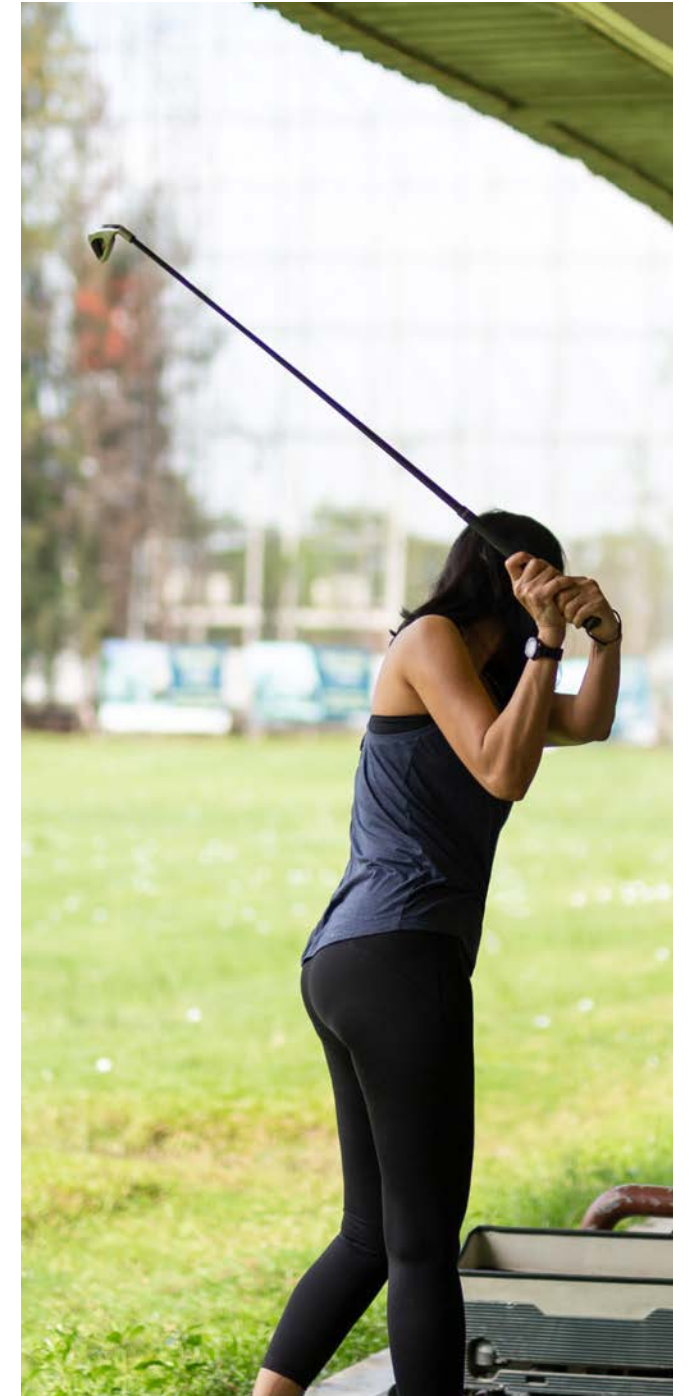

The aim is to position the location as a premium golf facility in South Australia.

World-class Trackman ball-tracking technology will be used in 24 new undercover bays.

This technology provides precise data for serious players and offers interactive, gamified experiences to attract casual users, making golf more fun and accessible.

Six green grass range bays will also be retained, catering to traditional practice standards.

This upgrade ensures all-weather, year-round access for all.

URBN SHANX mini golf

Expanding golf’s popularity with URBN SHANX mini golf.

We are bringing Australia’s second URBN SHANX mini golf course to the site. This contemporary, high-design course serves as a vital entry point for non-golfers, families, and young people.

In addition to attracting new participants to the driving range, the experience can also help people build confidence to try traditional on-course play.

Padel – a new sport for Adelaide

The site will also feature two padel courts with master planning for an additional two.

What is padel? Padel is the world’s fastest-growing racket sport, often described as a hybrid of tennis and squash. Played in doubles on an enclosed court with glass walls, it is easy to learn, highly social, and focuses on strategy and collaboration over raw power.

This is another way to position Port Noarlunga as a leading regional destination for this exciting new form of recreation and enhancing our diverse sporting infrastructure.

Recreation and prosperity

Maximising recreation benefits

This multi-sport facility will foster stronger community bonds and better health outcomes.

Creating inclusive, accessible, and diverse opportunities for physical activity—from the high-energy of padel to the social engagement of mini golf and the focused practice of the driving range—will ensure that high-quality recreation is available to people of all ages and abilities.

Delivering economic prosperity

The transformation is expected to generate significant economic returns. The enhanced facilities and new attractions will substantially increase visitor traffic and tourist spend within the region.

The long-term partnership model will secure the site's financial sustainability and create new local employment opportunities in facility operation and sports coaching, directly supporting the local economy.

Have your say

It is vital that our community has the opportunity to review and provide input on this proposal. Your feedback will help shape the final agreement.

Engagement is open
until 10 November.

Community Vision 2034

Connected community, sustainable future

This investment aligns perfectly with the themes from the City of Onkaparinga's Community Vision 2034 ensuring that our actions deliver maximum value to our residents across all pillars of our shared future.

Theme	Project alignment
Community	We are strengthening community connections by creating a multigenerational, inclusive hub for social activity, sport, and family gathering, providing safe and engaging places to be active.
Environment	The proposed design embraces a low-impact, environmentally sensitive approach, featuring a natural colour palette that harmonises with our unique coastal surroundings and protects the site's aesthetic character.
Liveability	By providing equitable access to world-class recreational facilities and diverse activities, we are enhancing the overall quality of life and making the region a healthier, more desirable place to live.
Leadership	This project showcases innovative leadership through strategic co-investment and partnership, ensuring the long-term viability of a key community asset and positioning Onkaparinga as a blueprint for modern recreation in South Australia.

Works are expected to start in 2026, with the existing facility remaining open for use throughout the staged construction program.
